MAXIMUM POWER IN LCG FORMAT!

The Competition Car Line battery from last year was successful around the world in many competition classes. At the same time, they have gained high level of acceptance and appreciation amongst the scene's best drivers – LRP batteries were the most used brand and at the EFRA 1:8 eBuggy EC two thirds of the A-finalists did use the blue energy.

The latest generation battery technology gets a new boost. The HV-LiPo Graphene cells offer even more power than before. They can be charged up to 8.7V without problem.

The again improved cell chemistry generates an extremely low internal resistance and therefore less heat buildup under load. The so called HDS-7 cell chemistry guarantees maximum performance over the complete race time.

The P5-HV technology with 5mm gold connectors and 7.6 (2S) technology underline the extremely high technical sophistication ... just as the Ultra LCG type for a perfect center of gravity and even higher corner speeds.

TECHNICAL DATA

LxWxH139.0 x 47.0 x 22.5mm
 Weight..... 274g
 Capacity..... 6400mAh
 Nominal voltage..... 7.6V

RC10F6 FACTORY TEAM KIT 1:10 SCALE FORMULA 1

**ESPECIALLY FOR TOUGH 1:8
COMPETITION USE!**

BE A TRUE FORMULA 1 CHAMPION!

With a full cast of setting options, an ultra-low center of mass, and sleek styling, the RC10F6 FT is designed to put you at the front of the Formula grid. With an increase in entries greater than any class at the highly contested ETS series, Formula is growing at a rapid rate.

All aspects of the RC10F6 FT were considered and optimized to make sure it would stand above its competition. Performance, adjustability, durability, and style were weighed heavily, and the RC10F6 FT kit shows its hand with a complete package of adjustments and options right out of the box.

From front to back, with graphite control arms, the fully adjustable front end, the ultra-smooth rear pivot, and wings styled after current full-scale Formula rulings, no corner was left untouched. At an affordable price point, the RC10F6 FT comes with everything to assure you will be at the front of the pack. With such a well-balanced platform, it's easy to see that the RC10F6 FT kit is another Champion by Design from Team Associated!

SC28 READY-TO-RUN LUCAS OIL EDITION

FULLY PROPORTIONAL STEERING!

MAXI RC SHORT COURSE ACTION IN MINI FORMAT!

A multiple National Champion in the Lucas Oil Off Road Racing Series, Carl Renezeder is also the first driver in short-course racing history to win championships in both two-wheel drive and four-wheel drive classes during the same season. His impressive list of victories easily makes Carl Renezeder the winningest short-course driver ever!

After a seven-year partnership with Carl on 1:10-scale and 1:8-scale projects, Team Associated World Champion RC Cars and Team Renezeder join forces once again, to bring you more race-winning excitement in an even smaller package! Wrapped in Carl's signature Lucas Oil race scheme, the SC28 comes complete with everything you need in one box - ready to rip around the corners, fly over the jumps and speed across the finish line!

The Qualifier Series is Team Associated's exciting new line of sport-level products that are designed to be FUN above all else, yet are lower cost, easy to use, durable, and provide an easy way to get into the RC hobby. When great looks and high performance are combined with quality features and value pricing, it becomes the ultimate sport product. When all this is offered from a company like Team Associated, it's nothing short of awesome.
