## ANTIX BY LRP 9000 GRAPHENE 7.6V LiHV - 45C LiPo CAR HARDCASE

### POWER YOUR RTR CAR!

The very first Antix by LRP product gets an update. Already known from high-end Competition LiPo batteries, the HV-LiPo GRAPHENE battery cell technology now also gained entry into our high-quality budget Antix by LRP LiPo battery line. The Antix by LRP GRAPHENE cells enable charging up to 8.7V (2S), greatly increasing the power output and runtime.

The batteries are still fully compatible to all 8.4V chargers. If you are charging them only to 8.4V two good things will happen to you. Firstly, the batteries will have a highly improved lifetime. Secondly, the batteries will still have a significantly higher power output at 8.4V charging compared to the 2016 line without GRAPHENE cells.

### TECHNICAL DATA
