MT-4 SET (TX+RX)+RX-472 RECEIVER COMBO

**ONE ADDITIONAL
RX-472 RECEIVER
INCLUDED!
SEPARATELY PACKED!**

MT-4 NOW WITH ADDITIONAL RECEIVER!!

The well-known and reliable Sanwa MT-4 is now also available with an additional RX-472 receiver. This additional receiver transforms the combo basically into a dual RX set.

The RX-472 receiver impresses with its small size, low weight and the super fast FH4 technology.

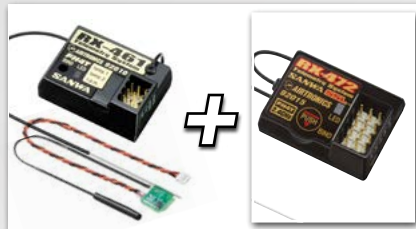

In combination with the MT-4 and the RX-461, they make the perfect trio.

FEATURES

- Super fast F.H.S.S.-4 technology
- Antenna integrated into the handle
- High-quality case and workmanship
- Menu selection – comfortable operation with scroll wheel
- Telemetry sensors included

SANWA RX-380 RECEIVER 2.4GHZ FH3 3-CHANNEL

SMALL, FAST, RELIABLE AND IS AT HOME IN ANY CHASSIS!

THE ALLROUNDER

The Sanwa RX-380 2.4GHz FH-3 is a universal receiver with 3 channels that is compatible with almost every Sanwa transmitter.

It works in the FH3 mode, is SHR (Sanwa High-Response) compatible and therefore enables the use of SRG series servos. Of course, all other servos can also be used without any problem.

Due to the continued development from Sanwa, the price could be lowered – without compromising on the well-known Sanwa quality!

COMPATIBLE TRANSMITTERS:

M12S, M12, Exzes-ZZ, Exzes-Z, MT-4S, MT-4, MT-S

FEATURES

- Compact allround receiver with 3 channels
- Nom. voltage: 3.7V - 7.4V
- 2.4GHz FHSS3
- Dimensions: 7.5 x 24.7 x 14.1mm
- Weight: 8.0g

THE REAR WING FOR MORE DOWNFORCE!

The hybrid rear wing for 1/8 racing from JConcept is made of clear polycarbonate already pre-cut and can be mounted with 4 different "tear-off edges".

According to the different track conditions, more downforce and therefore more contact pressure on the rear axle can be created. The divider that is mounted onto the middle of the wing creates additional stability.

The wing comes with screws and all mounting accessories and fits all 1/8 buggies and truggies.
