## LRP 3000 - LCG SHORTY P5 7.4V / 110C/55C

### LOWER CENTER OF GRAVITY

#### NEW P5 TECHNOLOGY

New 5mm gold plated battery plugs for lowest contact resistance and maximum power

**LOWER WEIGHT & CLOSER TO THE CHASSIS  
= PERFECT HANDLING & HIGHER CORNER SPEED**

#### THE LCG SHORTY FOR 1/10 2WD OFFROAD!

When it comes to 2WD and 4WD Offroad, the main factor for a battery is a perfect weight/power ratio. Batteries nowadays have enough power anyway for all Offroad classes, so it is much more important to have this power in a suitable package. This is the main philosophy behind the LRP LiPo Competition Car Line.

This LCG battery perfectly fits into standard 1/10th 2WD Offroad chassis. It features our lowest hardcase design for lowest possible center of gravity. This will result in higher cornering speed and better jumping. The weight is also reduced so your car is closer to the weight limit and gives you the possibility to add extra weight to adjust the balance of your car.

## FEATURES

- LCG = Low Center of Gravity for higher corner speeds
- NEW P5 Technology
- HDS-6 - High Density Stacking Technology
- 110C/55C LiPo Power

## ZR.30 SPEC.4 PULLSTART NITRO ENGINE

### NEW CARBURETTOR AND IMPROVED COOLING HOUSING!

## FEATURES

- Massive Big Block Size - Displacement is everything!
- New heavy-duty CoolDownMax cylinder head
- XTEC PowerCarb 3 15S-2 carburettor
- Universal fit - Fits all major .21 engine mounts
- 5 + 1 channels

Scan or click...

More information on the product page at: [www.LRP.cc](http://www.LRP.cc)

### THE NEW LRP ZR.30 SPEC.4!

Due to modifications of the already great predecessor, the new LRP ZR.30 Spec.4 Pullstart has been significantly improved in the carburettor vernier adjustment as well as in the cooling of the cylinder head. The Heavy-Duty CoolDownMax cylinder head that has already successfully been introduced with its bigger brother, now also serves in the ZR.30.

A completely new carburettor is now used for an even better adjustability especially when at idle speed. The performance, especially when accelerating from low speeds, has been improved with this move. All in all, the Z.R.30 Spec.4 offers more torque with better adjustability and improved responsiveness.

### TECHNICAL DETAILS

Max. RPM .....33.600 RPM  
 Engine size ..... 30 (4.92 ccm)  
 Power output..... 4.15 HP  
 Class ..... 1/8th Buggy & Truggy  
 Channels .....5+1

### THE NEW LRP ZR.32 SPEC.4!

The new LRP ZR.32 Spec.4 Pullstart is based upon the very popular ZR.32. In order to be able to again increase the enormous power of the 30 cubic monster, we build in a completely new constructed carburettor that has an additional notch for improved adjustability and that provides an even more efficient fuel-air mixture. This leads besides an improved idle speed setting, also to better responsiveness and more torque.

The already known Heavy-Duty CoolDownMax cylinder head provides sufficient cooling for this power unit.

## LRP B3-STX DELUXE 3-CHANNEL / 2.4GHZ

**69,99 EURO\***

**ENFORCED STEERING  
WHEEL SUPPORT!**

### THE ALLROUND TRANSMITTER FROM LRP!

The long time well-known and popular transmitter A3-STX Deluxe was the basis for the brand new B3-STX Deluxe. The housing was borrowed from it, but the steering wheel support was optimised and enforced. The danger of a sideways twisted-off wheel when used by untrained beginners was therefore significantly reduced.

The number of required batteries could be cut down by half to only 4, therefore significantly reducing the gross weight.

Features such as a Fail-Safe function or an End Point Adjustment (EPA) of course are also integrated in the set as well as a charging socket. All adjustable parameters can be viewed and set using the blue backlit display. The transmitter is also equipped with 15 model memory slots.

A small and lightweight 4-channel receiver is included in the set.

## FEATURES

- 2.4GHz FHSS technology
- Enforced steering wheel support
- 4-channel 2.4GHz receiver included
- Blue backlit LCD display
- Sensational price/performance ratio

## JCONCEPTS - AERO CAR STAND FOR 1/10 CARS

**20,99 EURO\***

**ROBUST POLYCARBONATE!  
FITS ALL 1/10 MODELS!**

### THE CAR STAND FOR 1/10 MODELS!

JConcepts begins 2016 with fresh pit-ware for the 1/10th racing scene. The Aero car-stand in matte black material stands out in any pit area and supports the vehicle with its unique footing and highly chiseled shape. A rail-like border contains the shape while a deep draw along the sides creates a bold surface for included decal or custom wrap. A "V" step-down feature was added to the ends which brings the styling back down to earth while the void creates added space below the vehicle.

The design team focused on several aspects and size was of utmost importance. A lower stance was built into the design and the smaller foot-print occupies minimal space in the pits. Top load pockets were incorporated as catch-all compartments for body clips, wheel nuts or any small items that are routinely changed during a race event. Triangle cushion pads are positioned on the top to provide support all the way to the edges on any platform vehicle to prevent slippage. JConcepts has included a decal wrap for maximum exposure and presence that resembles the popular chassis tape "Striker" theme.

More about JConcepts car stands – The polycarbonate car-stand, introduced first, by JConcepts, during the 2007 racing season has established itself as a benchmark in the R/C community. These stands can withstand abusive pit areas and racers throughout the world and have also been used by several key events as trophies or featured as grab-bag items.

## FEATURES

- Original, JConcepts Aero design
- Durable material, matte black finish
- Foam cushion pads included
- "Striker" themed decal wrap included
