## TEAM ASSOCIATED RC10B6 TEAM KIT

**WORLDWIDE  
FIRST DELIVERY!**

### CHAMPIONS BY DESIGN!

1:10 scale 2WD off road has been Team Associated's signature class since the release of the RC10 in 1984. The Team Associated RC10 buggy series has won 12 of the 16 I.F.M.A.R. World Championships contested since the racing class began. In fact, every Team Associated 2WD buggy platform ever released has won at least one I.F.M.A.R. World Championship!

In today's racing, traction dictates your setup -- period! With both B6 and B6D configurations available, getting to the top of the podium has never been easier. Out of the box, the B6 offers racers a setup developed for high to very-high traction, whereas the B6D excels when traction is low to high.

Racing at multiple tracks, or where traction changes throughout the day, has never been easier; setups and tuning parts are interchangeable between the two configurations, making the B6 platform extremely versatile. Both versions come with the speed, durability and lineage expected of a true champion.

Choose the configuration that suits your track and conquer the competition!

## FEATURES

- Hard anodized aluminum pocketed chassis
- Reverse bell-crank steering rack design
- Centralized motor positioning for best side-to-side balance
- Repositioned A plate for maximum front end clearance
- One-piece steering blocks with bolt on Ackermann plate

## TEAM ASSOCIATED RC10B6 TEAM KIT

Lightweight and durable aluminum C plate and aluminum ball stud mount

Adjustable battery hold-down strap allows weight bias tuning

Gear differential with Factory Team aluminum gear differential cover

Aluminum front axle and rear hexes for less rotating mass and long-lasting durability

Hard-anodized aluminum pocketed chassis included. Optional weights (not included) allow weight bias tuning.

3-gear laydown Stealth™ transmission with lightweight aluminum top shaft

Updated ball cups and turnbuckles for precise adjustments and durability

One-piece steering blocks with bolt-on Ackermann plate

Carbon fiber shock towers and gull-wing front arms with three shock mounting positions

Front and rear sway bar integration makes tuning easy (sway bars not included)

Reverse bell-crank steering rack design allows more room for electronics

**RC10B6 Kit shown equipped with items NOT included in kit: Reedy motor, Reedy battery, Reedy ESC, Reedy servo, XP receiver, wheels, tires and pinion gear. Body comes clear. Assembly and painting required.**

## SANWA M12S LIMITED EDITION BLUE-AL DUAL-RX SET

**STEERING WHEEL AND LOWERING MADE OF ALUMINIUM**

**INCLUDED ARE 2 RX-472 RECEIVERS**

### FEATURES

- Dual-RX = 2 x RX-472 receiver included
- Limited special edition
- Steering wheel lowering made of Aluminium
- Programmable for every purpose

Scan or click...

More information on the product page at: [www.LRP.cc](http://www.LRP.cc)

### BLUE IS BETTER - DESIGN

The new M12S limited edition Blue-AL is based technically upon the current (probably) fastest transmitter of the world: the M12S.

Besides the already known features such as an unbelievably fast response time of 0.88ms and the extensive programming options, the new version stands out due to the blue anodized Aluminium levers and buttons, the steering wheel lowering made of Aluminium as well as the steering wheel that is also made from Aluminium.

On top of that is the added scope of delivery that is made up of a second RX-472 receiver.

Therefore the M12S limited edition is applicable to every purpose and also looks outrageously great at it!

### COMPATIBLE RECEIVER:

RX-482, RX-481, RX-472, RX-471 Dual ID, RX-471W, RX-471, RX-462, RX-461, RX451R, RX-451, RX-380, RX-381

## SANWA MT-S DUAL-RX SET 2X RX-481 2.4GHZ/FH4T

**IDEAL SUPPLEMENT  
TO THE RC10 B6**

### THE TRANSMITTER FOR THE UPPER ENTRY-LEVEL CLASS!

The new Sanwa MT-S is the perfect transmitter in the mid-price range of high-end 2.4GHz telemetric transmitters. It offers a new design and new features. 8 different model types can now be chosen from that simplify the setup of the transmitter to the car.

All servos in the SSR mode can be used with this transmitter as well as Sanwa servos with SSL can be fully utilised. The MT-S is telemetry capable and is now also available as bundle with two RX-481 receivers (with integrated antenna). Perfect for everybody who owns more than one model and doesn't want to take the transmitter from one model to the other.

### COMPATIBLE RECEIVERS:

RX-482, RX-481, RX-472, RX-471, RX-471W, RX-471 Dual-ID, RX-462, RX-461, RX-451R, RX-451, RX-381, RX-380

## FEATURES

- Telemetry capable
- LCD display (128x64)
- White background illumination
- SSL compatible
- FH4/ FH3 mode
