## LRP 7500 - TC STOCK SPEC P5 - 110C/55C - 7.4V

**114,99 EURO\***

**THE ULTIMATE STOCK SPEC BATTERY!**

**INCLUDED FOR FREE**

### 7500 STOCK SPEC !

Specific LiPo competition hardcase batteries, tailor-made for each racing class. This ensures that you always have the best possible configuration for your needs and an advantage over your competitors -> You name it, we got it.

This battery is tailor-made for stock racing. It features a special chemistry that will provide a higher voltage output under load which gives you a power and speed advantage over your competition in stock racing classes.

Type: P5

Perfect fit for: TC stock

LRP Advantage: Discharge the battery to 3.3V per cell before charging it right before your race starts. This will increase power and speed.

HIGHEST VOLTAGE OUTPUT = MAXIMUM SPEED & ACCELERATION = FASTER LAP TIMES

## LRP 2600 - SUPER SHORTY P5 - 110C/55C - 7.4V

**53,99 EURO\***

**PERFECT FOR  
2WD MODIFIED!**

**INCLUDED  
FOR FREE**

### THE SUPER SHORTY!

When it comes to Electric Offroad, the main factor for a battery is a perfect weight/power ratio. Batteries nowadays have enough power anyway for all Offroad classes, so it is much more important to have this power in a suitable package. This is the main philosophy behind the LRP LiPo Competition Car Line.

This Super Shorty battery is the lightest of all our batteries. It fits into standard 1/10th 2WD Offroad chassis and can be moved further forwards and backwards. The low weight will result in higher cornering speed and better jumping.

Type: P5

Perfect fit for: 2WD modified

LRP Advantage: Lowest weight of all batteries, better jumping, most adjustable option.

WorksTeam tip: Move to the front if you need more steering, move to the rear if your car has a loose rear end. Work with additional weights to reach the weight limit.

LOW WEIGHT + MORE SETUP OPTIONS = DECISIVE COMPETITIVE ADVANTAGE

**SANWA**  
THE 2.4GHz SPECIALISTS

#### TELEMETRY AND LIGHTWEIGHT!

The Sanwa RX-47T with its only 6.6g is a super lightweight 4-channel receiver that is Sanwa Super Response (SSR) and Sanwa Secure Link (SSL) compatible.

It is also telemetry capable due to SSL and can readout data such as RPM and temperatures directly from the speed controls of the Sanwa Vortex line. Additional sensors are not needed.

#### RECOMMENDED FOR:

M12S, M12, EXZES ZZ, EXZES Z, MT-4S, MT-4 (not compatible with SSL), MT-S
