NEXT GENERATION 1/8 BRUSHLESS POWER!

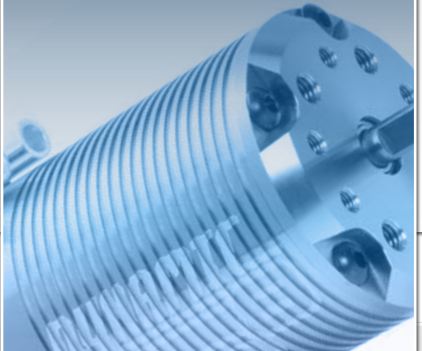

Is even more possible? Yes – a lot more!
 Due to the great demand, our LRP R&D team closed the gap between the 2200kv and the 2600kv motors. The 2400kv version of course is also 100% tailored to the 1/8 scale needs:

- High torque
- Maximised efficiency for low temperature development
- Robust/universal built

The multi-slot winding builds up torque without end. At the same time, due to the higher efficiency over the whole rpm range, highest speed and long runtimes are possible. In other words: less power is lost to heat and more power reaches the drive shaft. The decisive advantage at the next 1/8 scale race for you!

TECHNICAL DATA:

Kv	2.400
Voltage input	7.4 - 14.8V (2S-4S)
Efficiency	90%
Magnet material	sintered 4 pole
Weight	340g
Diameter	41.0mm
Length	65.5mm
RPM (at 14.8V)	35.440
Power (at 14.8V)	2.520W
Speedo suggestion	
.....	ix8 V2 BL speed control (#80881)
Application - Expert	BX

GRAVIT DARK VISION QUADROCOPTER 2.4GHZ

EASY SWAPPABLE & COLORFUL ARMS*

*not included, sold separately

COLOR YOUR GRAVIT!

Meet our latest quadcopter offspring. The LRP Gravit Dark Vision is equipped with the revolutionary quick mounting system. It works plug'n'play. You won't need any screws or soldering. Simply pull the arm of the Gravit from its retainer and push the optional colored replacement arm in and you are good to go. The arms including motor and propeller will be separately available in 4 cool colors: yellow, red, blue and green.

The Dark Vision is also equipped with a Full-HD camera that can be operated from the transmitter. The files are directly saved to the included 4GB Micro-SD card. You can stay up in the air for up to 14 minutes with the included LiPo battery.
