

NEW PRODUCT

GRAVIT DARK VISION QUADROCOPTER 2.4GHZ

EASY SWAPPABLE & COLORFUL ARMS**

**not included, sold separately

COLOR YOUR GRAVIT!

Meet our latest quadcopter offspring. The LRP Gravit Dark Vision is equipped with the revolutionary quick mounting system. It works plug'n'play. You won't need any screws or soldering. Simply pull the arm of the Gravit from its retainer and push the optional colored replacement arm in and you are good to go. The arms including motor and propeller will be separately available in 4 cool colors: yellow, red, blue and green.

The Dark Vision is also equipped with a Full-HD camera that can be operated from the transmitter. The files are directly saved to the included 4GB Micro-SD card. You can stay up in the air for up to 14 minutes with the included LiPo battery.

TECHNICAL DATA

Rotor diameter	205mm
Overall diameter	350mm
Overall height	185mm
Weight (Ready to Fly)	380g
LED lights	green/red
Control functions	up/down, forward/backward, turn left/turn right, hover sideways, looping
Battery capacity	2S LiPo 1800mAh
Video/photo function	yes/yes

FEATURES

- Revolutionary quick-mounting-system
- Full-HD-Action-Cam
- Headless Flying
- Multiple LED-System
- 360° automatic looping
- 4GB Micro-SD-card included!

More information on the product page at: www.LRP.cc

WHEN A LITTLE MORE IS WANTED!

The new Gravit Monster is the big brother of the Gravit Vision FPV. Our popular quadcopter hasn't only grown in size, but the motors are now also almost four times the size and correspondingly strong.

You can use your smartphone or tablet as FPV monitor for the Monster Vision FPV, on which the live feed from the copter will be shown. The videos and pictures can be directly saved to your mobile device and can therefore immediately be sent by email, messenger or be shared for example with Facebook.

Supporting flight modes like automatic landing and the headless mode make flying the Gravit Monster Vision FPV child's play.

TECHNICAL DATA

Rotor diameter	235mm

GRAVIT SMART VISION FPV APP-CONTROLLED WIFI-QUADROPTER

FPV HD-VIDEO TRANSMISSION & RECORDING

CONTROLLED BY YOUR SMARTPHONE**

**not included

Just download the free app to use your smartphone** or tablet** as a remote control and HD FPV monitor at the same time!

THE POCKET FPV ROCKET

THE PALM-SIZED FPV-COPTER

This incredibly small and easy to fly quadcopter can be completely controlled by your mobile device and can also send the live stream from the integrated HD Camera to your device's display. But there are more awesome features waiting to be explored. The Gravit Smart Vision FPV can start and land automatically by the tip of your finger. Also the headless and training modes make it even easier to keep the control over this powerful mini drone.

You can use it as a selfie drone with the altitude hold mode or flip it around in any room with the 360° looping function. Draw the flight course on your display and the Smart Vision will follow your route. The transmitted video stream can be saved directly to your mobile device and is ready to be shared with the world!

FEATURES

- Headless Flying - Easily control your Gravit without caring for its actual orientation
- Altitude Hold - Holds altitude automatically
- Auto-Land - Gravit lands automatically and turns off the motors
- 360° automatic looping
- 3 Power-Levels (including Training Mode)
- LED position lights
- Built-in 6-axis gyro
- Spareparts available

GRAVIT FPV XTREME 80 2.4GHZ RTF RACE-QUADROPTER

HIGH-SPEED
BRUSHLESS RACING
UP TO

80 KM/H

GRAVIT FPV XTREME 80

START FPV RACING NOW

5.8GHZ FPV-LCD-MONITOR & HD-CAMERA INCLUDED

THE POWERFUL FPV-COPTER!

With the Ready to Fly Gravit FPV Xtreme 80 Race Quadcopter you can start your FPV career immediately. The performance 250 size copter comes professionally pre-assembled and pre-flight checked. So all you have to do is charge the LiPo battery with the included charger, grab your transmitter and power up the included monitor to enjoy the world of FPV racing.

Thanks to the powerful brushless motor you are the only one who is setting the limits! The high quality receiver is compatible to Futaba RC systems and comes with a monitor mount to fix the LCD Monitor on it.

FEATURES

- High-Speed Brushless Racing - Up to 80 km/h top speed
- HD-camera with 5.8GHz FPV - Record your flights on Memory-Card
- 5.8GHz FPV-LCD-Monitor included - Use the included LCD-Monitor to train and fly FPV
- Carbon-fibre enhanced - Light-weight and bullet-proof carbon fibre materials for best efficiency and sturdiness
- Optional ACRO-Mode included - Fly your Gravit with maximum manual control for amazing stunts and flips
- Powerful brushless motors for ultimate speed, agility and performance

NEW PRODUCT

MT-1 ELECTRIC OFFROAD MONSTERTRUCK 2.4GHZ RTR

1:12 SCALE

HEAVY DUTY
MAXIMUM DURABILITY

HIGH SPEED

READY TO RUN
INSTANT ACTION** - PERFECT FOR BEGINNERS

FEATURES

- RTR* - instant action. Perfect for beginners and advanced drivers
- Digital proportional 2.4GHz radio set - simultaneously race with multiple cars.
- Extended runtime - 10-15 minutes runtime with each battery charge.
- Completely mounted and ball bearings included.
- Heavy-duty steel drive shafts for maximum power and durability

SMALL TRUCK? BIG FUN!

The all new MT-1 Monstertruck from ANTIX by LRP will be the new star in your backyard.

Easy to handle 1:12 scale Monstertruck with full proportional steering and throttle functions,, a replacable LiPo battery with quick charger, 2.4Ghz transmitter which is just perfect for younger pilots hands and a great Monstertruck Bodyshell with big dirt rubber wheels is what you get in the box.

Just charge your new backyard beast and take it outside. With a maximum speed of 35km/h it will be the next must-have in your neighborhood. Bash the garden or race with your buddies - the MT-1 is the tool of your choice!

NEW PRODUCT

LRP PROUDLY PRESENTS: **FLOW X**

THE SPEED CONTROL FOR PURE RACING!

Following its brief introduction with the Worlds Championship Win in Beijing, LRP launches the long awaited all new top of the line Flow X TC Spec speed control to the public. As the first of an upcoming series of class-specific Flow X ESCs, the TC spec comes with the following new main features:

- LRP's exclusive Customized Super FETs (CSF-01) for highest power output and efficiency
- Heavy duty 2.8mm 8-layer power board for minimum resistance and lowest core temperatures
- IFMAR Worlds winning v4.1 software specialized for touring car racing
- Bulletproof 6V/6A BEC for the most reliable power output
- Full aluminium case in exclusive state of the art design

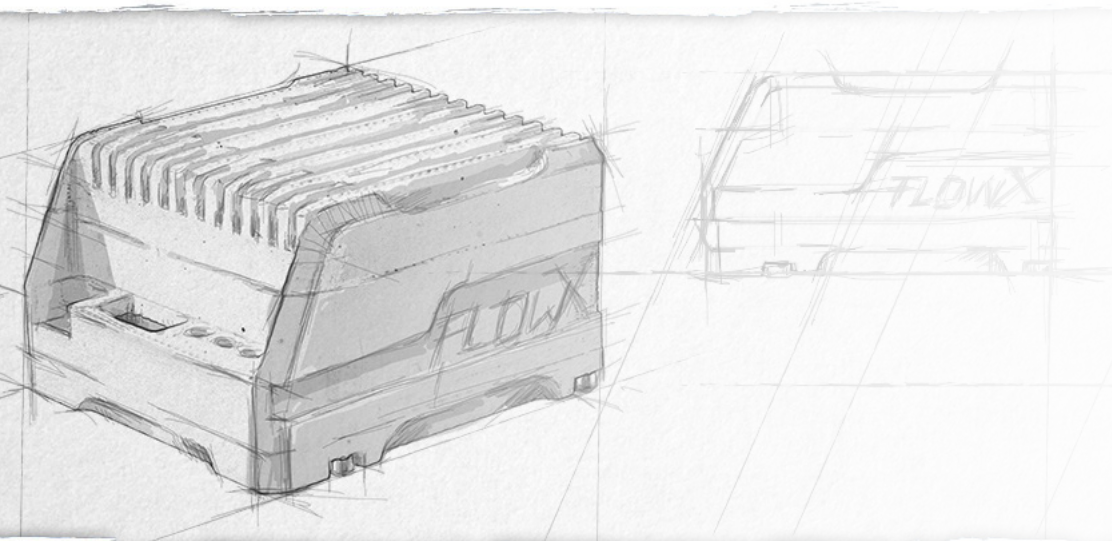

SINCE

DEVELOPED IN GERMANY

1987

MANUFACTURED IN EUROPE

All new power & logic board hardware | Customized LRP cooling plates | Lowest internal core temperature | Black super flexible WorksTeam customized power wires | Black short receiver wire | Selected hardware components | Low profile case design with improved air-flow | Easy solder system | Dust and waterproof buttons (IP68) | v4.1 touring car onroad software for Modified and Stock classes incl. Boost 0 | Multi-mode power profile adjustment & new MPS4 protection system

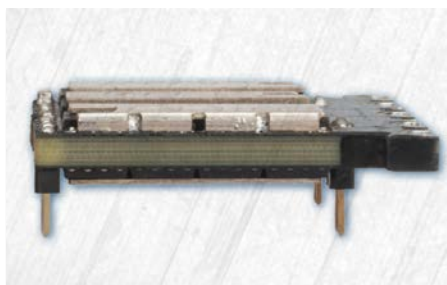

TECHNICAL DATA

Cont. Current	220A
Peak Current	up to 1800A
Voltage Input	7.4V (2S)
Motor Limit	>2.5T
BEC	6V/6A
Software	v4.1
Case Size	33.7x32.6x19.8mm
Weight	44g (excl. wires)
Power system	Sensored brushless
Driving function	Forward/Brake
Power Wires	WorksTeam 12 AWG black

Special new brakes types BDX10 and BDX20 made especially for the FLOW X for the most consistent and powerful braking in every condition | New electronic timing algorithm for smooth and yet extreme power gains | Timing delay feature for smoothest throttle control | Optimized internal adjustments of the microcontroller parameters for faster response and consistent running | Optimized Protection levels with precision temperature readout | Tested in hardest race conditions | 100% LRP quality approved with sophisticated functional and electrical test incl. drive simulation | Order Number: 500004

NEW PRODUCT

LRP proudly announces the release of the long awaited IFMAR Worlds winning Flow X competition speed control. Its unique combination of hardware and software features was created to deliver maximum performance on the track without compromise for touring car racing. With this in mind, Flow X comes fully equipped to bring the best experience to the user in every racing situation.

The Flow X comes equipped with completely redesigned power board and logic board to unleash the full potential of the new software and to provide reliability for today's extreme racing demands. With 8 copper layers and a total thickness of 2.8mm, the Flow X heavy duty power board achieves minimal resistance and drops core temperatures significantly.

First time in use are LRP's exclusive Customized Super FETs CSF-01. To improve internal cooling further, new copper cooling plates come soldered on both PCB sides. Backed with a bulletproof 6V/6V BEC and newly selected high quality components ensure most consistent operation under extreme loads.

Finally, rounded off with pre-soldered all black 12AWG power wires, short receiver lead and astonishing new dark blue full aluminium case with aluminium pushbuttons, the new Flow X will completely stand out and be perfectly fitted to any touring car chassis.

The Flow X TC Spec comes pre-installed with the IFMAR Worlds winning v4.1 software. Smoother driving feel with maximum power output and consistently strong brakes were the main focus points on this new software creation. All new brake types developed especially for the Flow X will match any driving style and situation on track, while the new Torque feel, Timing and Delay features are to provide the smoothest throttle control with highest top speeds at any racing track.

Timing parameters in Flow X have been completely revised and now feature exceptional improvements in terms of power delivery. To give Stock class racers the edge, the benefit from the feel of a pure LRP speed control is backed with the power board's low resistance, ensuring most direct motor control with minimum losses. By the time of release, LRP continues to use its well-known effective system for fast trackside adjustments with pushbuttons, with no need to use a separate programming unit. The Flow X speed control series however is designed to support external programming device which is planned to be offered later on. Combined with an all new user manual concept, the Flow X remains effective and easy to use for everybody.

The Flow X TC spec is available now.

Please feel free to visit LRP online at www.lrp.cc/FlowX for latest information with manuals, tech tips, setups, tutorials and updates.

Included in the package:

- Flow X TC spec ESC
- Installation manual & Software guide
- 30x30x7mm fan
- 4x short and 4x long lightweight blue alum. fan screws
- LRP sticker sheet
- 100mm Hall sensor wire
- 40x40mm double-sided tape
